FRESH DROP

NOW AVAILABLE IN OUR COUNTRY UF RANGE

Hoof Solution

UNIQUE PATENTED FOOTBATH TECHNOLOGY
FOR CATTLE AND SHEEP LAMENESS

- Scientific patented formulation to create unrivalled footbath technology
- Solution works by penetrating deep up into the hoof cleft
- Safer for user with fewer Health & Safety implications

NEW TECHNOLOGY

STARTECT Dual Active Oral Solution for Sheep is a broad-spectrum, short-acting oral drench designed to control mixed gastrointestinal nematode infections.

It combines two active ingredients, Derquantel (Group 5-SI) and Abamectin (Group 3-ML). Both effectively target worms, including those resistant to other treatments. This dual-action approach helps manage resistance and supports overall flock health and productivity.

As one of the newer wormer groups, Zolvix, the orange group 4-AD wormer, should be used in every flock, every year for two specific purposes:

Quarantine treatment for all incoming and returning stock: following the right protocol as is important as using the right product.

A mid to late season dose for all lambs present at that time (finishing, replacements and stores) in the latter part of your farm's grazing season when a worming treatment is needed - the Break Dose.

NEW! Cheviot Brown Bloom Liquid 1L Concentrate. Full range of sheep colouring options available in our Country Store for your desired look!
